Harbormaster Waypoint 1/2017

Fellow Boaters:

I'm back! My 2017 season started on Monday April 17, and will run through Columbus Day. I am working with Kim to sort through all the relocation requests, boat size changes, and new permits. We will do our best to accommodate as many as possible. In the meantime, I am also getting both boats ready for launching in the next week or so, depending upon the weather.

Speaking of weather, Easter weekend was unbelievable with sunny skies and temps into the 80's. I hope that bodes well for some nice summer weather ahead. I know that it was a sneak peek at what lies ahead and probably motivated many boaters to get going on bottom painting, repairs, and preparations. Please be mindful that this is an extremely busy time of the year for all of us around the waterfront, and both Kim and I will try to be responsive to your needs/requests.....but please be patient.

Over the winter several boaters decided to relinquish their moorings and we are using the vacated spots to honor relocation requests and assign new permits to people who have been on the wait lists for many years. Consequently, some of the people relinquishing their moorings have expressed an interest in selling the tackle. At their request, we have developed a list of people looking to sell their used gear, if anyone is interested. Kim or I will provide the contact info, and then you can proceed from there.

Looking ahead, here are some **Important Dates:**

- a. **May 15, 2017: Renewals are due.**
- b. **June 15, 2017: End of grace period for renewals.**
- c. **July 1, 2017: ALL moorings must be in commission, properly labeled and have the current permit sticker applied.**

Smooth sailing - See you on the water!
