Lumen Ambient Temperature (LAT) Multipliers

Use these factors to determine relative lumen output for average ambient temperatures from 0-40°C (32-104°F).

Average Lumen Ambient Temperature (LAT) Multipliers			LED Packages
°C	°F	Lumen Multiplier	
0	32	1.07	
5	41	1.06	
10	50	1.04	
15	59	1.03	
20	68	1.02

35	95	0.97	
40	104	0.95	

Projected LED Lumen Maintenance

Data references the extrapolated performance projections for the platforms noted in a 25°C ambient, based on 10,000 hours of LED testing (tested per IESNA LM-80-08 and projected per IESNA TM-21-11).

To calculate LLF, use the lumen maintenance factor that corresponds to the desired number of operating hours below. For other lumen maintenance values, contact factory.

Lumen Maintenance - (same for all LED packages)							
Hours	0	25,000	36,000	50,000	60,000	75,000	100,000
Factor	1	0.91	0.88	0.85	0.83	0.79	0.74

The italicized data is extrapolated beyond the TM-21 standard.

$$E = (LM) \times (CU) \times (LAT) \times (LLD)$$

LM and CU are obtained from published photometry.

Specifications

DESCRIPTION

The Memphis Pedestrian luminaire is styled to replicate the "teardrop" luminaires that lighted boulevards in the first half of this century. Designed for light control and ease of installation and maintenance, the Memphis Pedestrian has a precision optical system for true street lighting performance.

WIRING CHAMBER

The wiring chamber has either a 1.50 inch NPT and stainless steel set screw or a welded stem. The stem aids in installation speed. A three station terminal block will accept #16 through #2 wires and is prewired to one half of the plug assembly that connects to the removable electrical module.

ELECTRICAL / REFLECTOR ASSEMBLY

The unitized electrical assembly, composed of the electronic driver, surge protection device, and other selected components is mounted on a removable tray. The assembly is easily accessible by loosening the optical wing nut and opening the optical door. The disconnect plug connect the driver to the terminal block located in the upper housing wiring chamber. On the underside of the electrical assembly facing downward is the LED module, which is sealed to the door assembly cradling the glass lens.

MOUNTING STYLE (LEVELING FITTER OPTIONS)

The Quick Lock Stem Mounting style is compatible with the following leveling fitters:

- Boston Harbor Decorative Arm Fitter (BHDF13)
- GlasWerks Decorative Arm Fitter (GWDF13)
- West Liberty Decorative Arm Fitter (WLDF13)

LED MODULE / REFRACTOR DOOR ASSEMBLY

The cast aluminum door cradles a teardrop or shallow prismatic, thermal resistant borosilicate glass refractor that controls the light to provide the desired asymmetric or symmetric distribution. The refractor (and optional decorative skirts) hinges form the main electrical housing and is latched by a corrosion resistant, captive, wing nut assembly. There are two or three COB (Chip on Board) LED's (dependent upon wattage package desired) mounted to an aluminum heatsink for optimum thermal operating characteristics. The LED's are covered and sealed by individual borosilicate glass lens', designed to provide the appropriate asymmetric or symmetric distribution in conjunction with the main teardrop or shallow refractor.

DRIVER

LED 0-10V dimmable driver is standard.

FINISH / MATERIAL

The luminaire is finished with polyester powder paint to insure maximum durability. All castings utilize low copper aluminum for maximum corrosion resistance and all exposed hardware is stainless steel.

WARRANTY

The Limited warranty located at <http://www.acuitygrands.com/resources/terms-and-conditions>.

CSA listing suitable for wet locations.
