To Whom It May Concern:

I am writing this letter on behalf of K Electric in Warwick, RI. I have worked with K Electric over the last 7 years and during that time have done multiple projects with them.

The projects that we have been involved in have been complex and the team at K Electric did an outstanding job. The projects included electrical design and installation, structural design and installation and electrical controls.

I highly recommend K Electric for any type of electrical project and feel comfortable with using them in many different types of projects.

I have a great deal of confidence that any future projects that we are involved in will be handled with the utmost integrity and a high level of customer service.

If you have any questions please feel to contact me to discuss further.

Sincerely,

To Whom It May Concern,

I am writing this letter to provide a reference for K-Electric. I have been using K-Electric for over 15 years. They do an excellent job, are always punctual, and offer the most competitive rates in town. They are always here when you need them and that's important for a business like mine.

K-Electric to me is one of the best around. Their employees are courteous and helpful and perform quality work.

I'm happy to recommend the services of K-Electric. If you have any questions, feel free to contact me.

Dave:

wanted to personally thank you for helping to coordinate the repair of the damaged conduit at our Hunter Lab Project.

especially want to note the performance of two K-Electric employees throughout the repair. Corey Fontaine and Joe Simon were extraordinary under pressure and did an excellent job representing your expertise and company.

Painstakingly methodical, safe, thorough, communicative and easy to work with, does not go far enough to describe their performance in what turned out to be a couple of really long nights this past weekend. It was a pleasure to work with them. At some point, we can talk and I can go into more detail

Please extend this note of appreciation to both Corey and Joe for me.

Thank you

Letter of recommendation

Re: K Electric Company Performance  
Utility Systems Renewal and Upgrade Project  
Brown University

K Electric recently completed a major upgrade of the medium voltage electrical distribution system on the Brown University campus in Providence, RI. The total cost of the project was about \$10 million. K Electric performed most of the field work and they did so in an exemplary manner. Their people are extremely knowledgeable and are consummate team players.

The electrical distribution system had been built over an 80 year period and had never had a comprehensive upgrade and renewal. It presented some very difficult challenges, working with very old equipment while maintaining electrical service to 150 buildings. This required detailed knowledge of a complex distribution system and its limitations and capabilities. It also required an acute awareness of safety concerns.

K Electric proved to be a key component in the successful execution of the project. They were very flexible in scheduling, and often rescheduling, the work to minimize impacts to the university community. I recommend them highly for any electrical work of this nature.

To Whom It May Concern:

I offer this letter of recommendation for K-Electric, Inc. on behalf of the Town of North Providence, Rhode Island. I serve as the Project Manager for the Town and have dealt with numerous sub-contractors in all construction mediums. Barring none, K-Electric of Warwick, RI is the most user-friendly and professional contractor that I have worked with during my twelve (12) year tenure with the Town of North Providence. Their expertise and professionalism begins with their office administration and continues with their laborers, supervisors and owner. As a whole, they are pleasant and markedly client oriented. Their product and trade level of expertise is superior and again client driven. I highly recommend K-Electric.

I can be contacted at the North Providence Town Hall, 2000 Smith Street, North Providence, RI 02911. My direct telephone line is 401.231.0096 or cell 401.255.3069.

Dear Dave,

I have mentioned this to you in passing, but wanted to also document for the record that I and others involved in the above referenced project felt that the team you assigned (Al Marchand, Eddie and Cory) did an outstanding job in bringing that very difficult project to completion. It was a pleasure working with those individuals, as well as you and your firm, over an extended period of time.

There were a minimum of problems, if any, due to the actions of your field personnel and the foresight, and the quality of workmanship which Al brought to this and related projects were highly commendable. The end result, as we now look at the space, is a very positive testament to the whole team's efforts.

Please pass a copy of this letter on to Al, Ed and Cory.

Respectfully,

  
Jack W. Dean, P.E.

Subject: Site Electrical

Dear Mr. Kirk:

In my busy days at the Wriston Quadrangle Phase II project, I feel compelled to take the time to extend praises to K-Electric, Inc. for contract work completed during the winter months of 1995 and 1996. It should be noted that this scope of work was performed under severe winter conditions (record snowfalls), numerous scope changes (increase of 25% from original contract amount) and an aggressive schedule.

The high voltage work and the new emergency power distribution systems to all (9) buildings were performed with strict compliance to the contract documents. The level of quality in craftsmanship was of the highest grade which began with the owner of the company and transcended to the journeyman in the field. Please extend my sincerest gratitude to Jim and his men for a job well done. K-Electric established a momentum and a precedence on this project which continues on site today.

Please also accept my offer to utilize my name and position of responsibility with Gilbane Building Company in your pursuit of future work. It is the least I can do for all that you have contributed to this project. The quality of work provided to this project is what I believe is the most obvious attribute of the site electrical work performed by your firm.

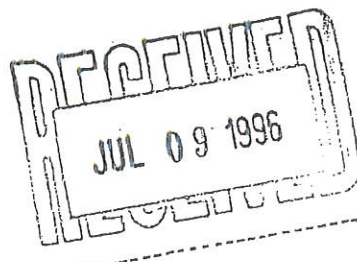

Sincerely,

GILBANE BUILDING COMPANY

Dear Constance,

On May 9, 2018 I conducted an unannounced service visit to your jobsite located at 34 Kenyon Lane, Hopkinton, RI. I introduced myself to your employee, Gary Resendes, who was polite and cooperative in answering my questions about the work being performed and the safety procedures that are in place while working in a bucket truck. At the time of my visit Mr. Resendes was installing equipment and a cable to a service pole. The service pole is used to support electrical equipment that will supply electricity to the solar panels that are located onsite. Mr. Resendes stated that the installation and the work involving the solar panels were performed by another contractor. At the time of my visit I did not note any safety violation or hazards. Mr. Resendes was properly using personal fall protection equipment and the bucket truck inspection was up to date. As always, safety training and education is important in preventing workplace injuries and incidents. I encourage you to visit our updated website at [www.beaconmutual.com](http://www.beaconmutual.com) where you can learn about all the outstanding services offered to you as a policy holder. The website is easy to navigate, full of resources and various information to assist in managing your workers' compensation program.

Re: Activity Type: Re-Survey  
Policy Number: 0000019879

Dear Connie,

I would like to thank you for meeting with me to conduct a loss prevention survey on October 21, 2015. The visit was conducted at your office 2646 Warwick Ave. Warwick, RI. The purpose of this meeting was to discuss company operations, review loss prevention services, and seminars, and conduct a safety walk through of the facility.

During the visit we discussed the variety of services available to all Beacon Mutual policyholders through the Loss Prevention Department. Safety seminars are held throughout the year at the Beacon Mutual campus and there are also a variety of safety and ergonomic in-services that can be brought to a policyholder's location. You can schedule these services directly through me and, any training can be delivered to multiple groups to prevent operations from being overly compromised. Topics include: Healthy Back Training/Ergonomics, Preventing Slips, Trips & Falls, Bloodborne Pathogens, Lock Out/Tag Out, Defensive Driving and a variety of others. Please let me know if you are interested in providing any of these valuable services to your employees and I will request the appropriate personnel here at Beacon Mutual to contact you to schedule.

**Safety Controls:**

All safety policies and procedures are in place and adequate, no required recommendations are needed at this time.

**Loss Experience:**

I commend you and management team for your current loss ratio of 0% and the historic ratio of 4 %.

RE: Loss Prevention Service Visit  
Beacon Mutual Insurance Co. Policy #: 19879

Dear Constance,

On August 18, 2014, I conducted a loss prevention service visit at the URI Center for Chemical and Forensic Science project located on the campus of University of Rhode Island, Kingston, RI. At the time I was conducting a safety walk of the area with another construction company who is a Beacon Mutual Insurance policyholder.

**Safety Controls:**

I observed your operations and spoke with your foreman, Jeff Simons and another electrician about company operations and safety procedures. Both employees were cooperative and professional. The employees were observed working in and around a confined space area. The area was well marked out, tripod and rescue devices were in place and both employees were properly wearing fall arrest equipment. At this time all safety policies and procedures are in place and appear adequate. I commend you for maintaining a healthy and safe environment for your workers. No recommendations are needed at this time.

**Loss Experience:**

I commend you for your overall efforts with the company's ongoing employee safety training. Your current loss ratio is 0% and your historic loss ratio is 5%.

Dear Mr. Kirk and Staff,

On behalf of the entire administration, faculty, staff and our satellite programs the Warwick Area Career & Technical Center wish to take this opportunity to thank you and your school's representatives for providing exceptional instruction to our senior interns during their recent internship experience with your organization.

The feedback we are receiving from our students, instructors and family members is extremely gratifying. Our students have changed; we have noticed more positive attitudes, enthusiasm, motivation, and high self-esteem after our students complete this industry experience. This indicates to us that the program is an overall success. You can certainly be proud of yourself and your staff members who have generously volunteered time and provided instruction so that our seniors could have this exceptional opportunity.

Your continued support and participation in this educational experience is greatly appreciated. By your agreeing to provide students with mentor/supervisors, you have created a better student, citizen, and future employee. Thank you for playing a major role in our effort to reach out to those students in need of this truly "hands-on" educational experience. The support given by positive caring adults such as you will long be remembered. You are truly making a difference!!

Dear Mr. Kirk:

This letter serves to express my gratitude for your fine work on the recent installation of the Hopkinton Town Hall generator. Your company was completely professional in all respects – the work was done effectively, neatly and without interruption to town hall activities. Moreover, your firm proved to possess the administrative capacity needed to deal with the special requirements of federally-funded projects.

I would wholeheartedly recommend your company to anyone in need of electrical services.
